This instrument is especially designed for the DR. SACE'S CATARRH REMEDY. and perfectly applied to all parts of the affected masal passages, and the chambers or cavities communicating therewith, in which sores and ulcers
frequently exist, and from which the catarrhal discharge generally proceeds. The want of success
in treating Catarrh heretofore has arisen largely
from the impossibility of applying remedies to
these cavities and chambers by any of the ordinary methods. This obstacle in the way of effecting cures is entirely overcome by the invention
of the Douche. In using this instrument, the Fluid
is carried by its own weight, (no sauling, forcing or
pumping being required,) up one nostril in a full
cently flowing stream to the highest portion of the
nasal passages, passes into and thoroughly cleanses all the tubes and chambers connected therewith,
and flows out of the opposite nostril. Its use is pleasant, and so simple that a child can understand
it. Full and explicit directions accompany each instrument. When used with this mptoms of Catarrh. Frequent head-
